Release date: 28/04/2020

British Association of Day Surgery (BADS) Module Update

CHKS have updated the CHKS BADS Module as follows:

1. BADS Module 'Target View': Outpatient activity and targets have been added in line with the BADS Directory of Procedure targets:
 - Three new columns added: Outpatient count; Outpatient Rate and Potential Admission Savings
 - Total procedures have been amended to include those reported as outpatients as well as day case and inpatient admissions
 - Targets have been updated, where applicable, to take account of outpatient activity and BADS outpatient targets
2. OPCS criteria throughout the module (Target and day case views) have been updated to accommodate the latest OPCS49 updates.
