

CHKS live – Release Document

Release date: 09/06/2021

Market Intelligence Product Update

The CHKS Market Intelligence programme has been updated following client feedback. The details of the changes and additional functionality are detailed below.

If you want to discuss any on the information included in this release note please contact your CHKS consultant or e-mail info@chks.co.uk.

New or Amended Features

Maps

- The size of the circle when viewing maps in the *Focus View* for GPs or Trusts changed to reflect activity (volume).
- The overlay of graphics on maps has been updated so smaller circles stack on top of larger ones, ensuring all remain visible.

Diagnosis and Procedure filters

Functionality has been added to allow users to filter by procedure and diagnosis. Users can choose:

- to filter on three, four or five character codes.
- to apply filters to primary diagnosis only, secondary diagnoses only or both primary and secondary.

Two additional options in Application settings

- Option to display both codes and descriptions or only descriptions in the *Activity View*
- Option to toggle MFF on and off

Change to Summary Header

The header within the activity and My Market view will now denote which data set (Inpatient, Outpatient) has been selected.

Change to Focus view icon

The icon to remove the CCG/GP focus view has been replaced.

Maintenance

- The User Guide which can be found online has been updated to reflect the above changes.
- Decimal points have been removed from Income in Scorecards.

Bug fixes

- Performance & Efficiency tab now correctly shows all HES activity.
- pdf exports now correctly include information about any filters and 'show bys' applied

The next planned CHKS Product Update is scheduled for Q3 2021. This release is subject to change due to resource allocation.
